Healthy Volunteers Needed for a **Music and Creative Thought Study**

You might be eligible if:

- You are **between 50-95 years of age**
- No known neurological conditions or major psychiatric conditions
- English as first language or acquired at young age (< 5years)
- Normal (or corrected to normal) vision and hearing
- **Are keen to contribute to expanding knowledge in the field!**

Participation Involves:

This research is looking at **music and creative thought** and utilises the **TuneChair**.

The TuneChair is a recliner lounge chair which has been adapted to push fine-level, low frequency vibrations through the chair. Participants will be seated in a relaxed position in the chair while listening to a 20-minute peaceful musical soundtrack. Many people have reported finding the TuneChair to be a very **pleasant experience**, but this has not yet been established in research studies.

Participation involves attending the UQ Neuropsychology Research Clinic for three, 2-hour sessions held across one week. Participants will be asked to fill out questionnaires and complete tasks assessing their thinking skills. You are able to **choose what days/times work best for you** and there is free parking at the clinic (**39 Upland Road, St Lucia**).

Vouchers are also available to **reimburse travel costs**.
